KOALA BR8

Koalabr8 : This Edition Revised By Chris Baker

A group of Koala bears got trapped in a maze. This is a rather nasty environment for Koala bears. It contains explosives and moving saws that clearly must be avoided. It is the task of the player to guide the Koala bears through many different maze levels such that they can finally escape.

The player can give the bears instructions to move left, right, up and down, using the arrow keys. But all bears will react simultaneously to the commands. So all bears will move together, unless they are blocked by a wall. So it is impossible to e.g. move them one by one to the exit.

The maze will contain explosives that must be avoided. If a Koala bear is killed the player must redo the level. On later levels there will also be moving saws. Some passageways will be locked and can only be opened by switches that a Koala must reach. Locks and switches come in different colors that must be matched. Also there will be rocks that the Koala can push away to create a route or to block the saws.
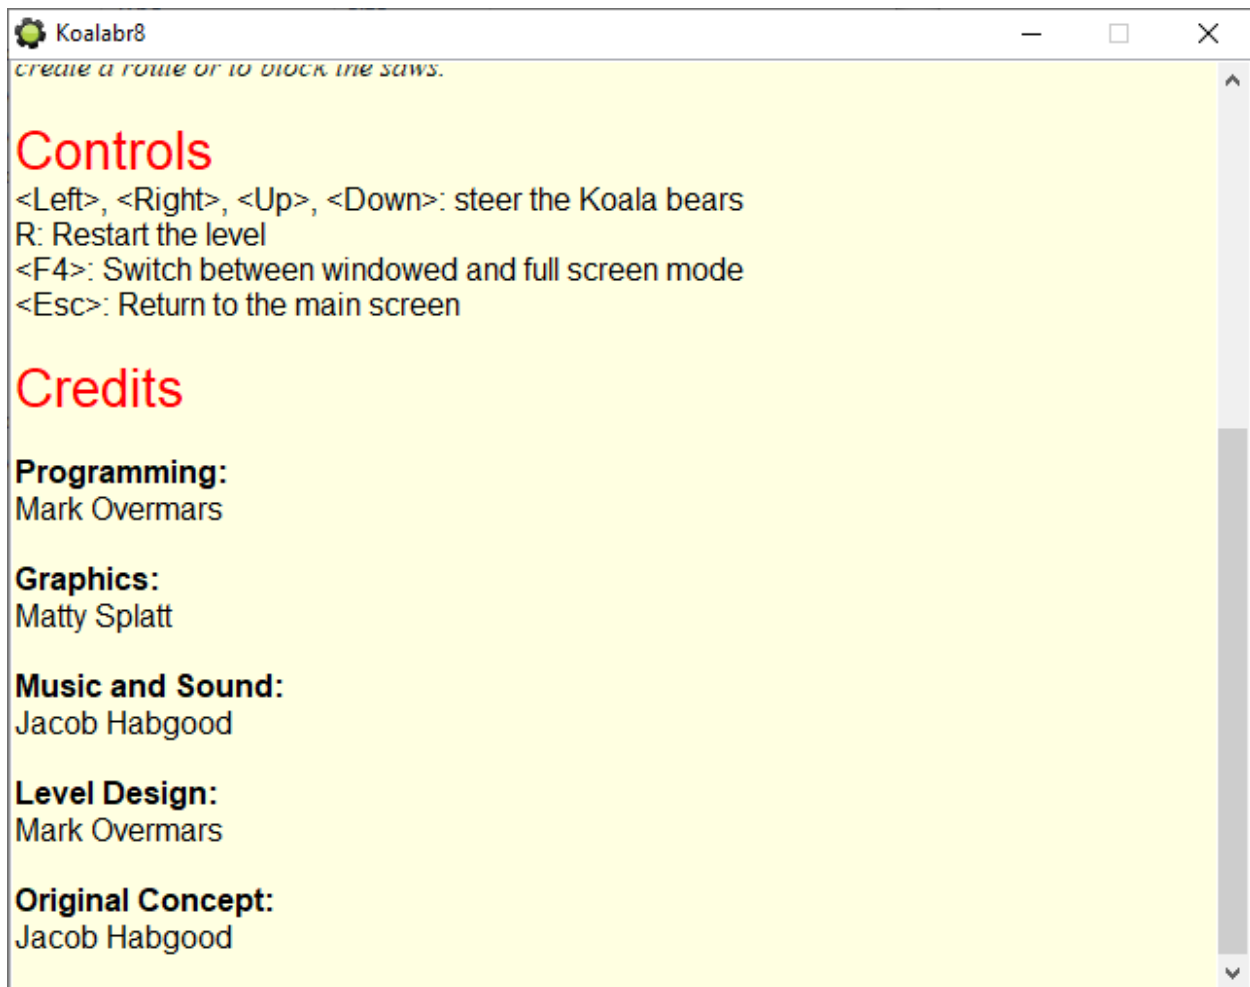

Controls

<Left>, <Right>, <Up>, <Down>: steer the Koala bears
R: Restart the level
<F4>: Switch between windowed and full screen mode
<Esc>: Return to the main screen

SUPER RAINBOW REEF

Super Rainbow Reef: By Chris Baker

Description:
Biglegs have invaded Rainbow Reef and it is up to the average sea creatures Pop and Katch to fight them back
with their newly created fighting tactic of bouncing Pop from Katches shell at a progressivly increasing velocity to
vanquish Biglegs. Can you help Pop and Katch save the reef, or will it be overran by Bigles.

Controls:
Left Key- Move Left
Right Key- Move RIght
S Key - Save Game
